Society-technology interface and digital transformation in India, digitalisation in agriculture and agricultural credit, digitalisation in healthcare, labour markets, employment and livelihoods, rural digital development, social media and algorithms, management and data analysis, data gaps in Indian official statistics (PLFS, NFHS, HCES), digital governance and evidence-based public policy, and digital privacy and data protection.

E D U C A T I O N

M.Sc. Digital Society, Central University of Rajasthan, Ajmer - 76.5% (2024-2026)
A multidisciplinary postgraduate programme at the interface of social sciences and information and communication technologies. Core papers included Quantitative Techniques, Research Methodology, Public Policy Paradigms and Practices, ICT Policy and Regulation, Law and Digital Society, and Digital Media, Culture and Society. Dissertation: Impact Assessment of the Dvara KhetScore Model on Agricultural Credit Access among Farmers in Dudu and Phagi Tehsils of Jaipur, Rajasthan (supervisor: Dr. Jaya Kritika Ojha).

B.Sc. (Physics, Chemistry, Mathematics), Chhatrapati Shahu Ji Maharaj University, Kanpur - 81% (2021-2024)
Studied physics, chemistry and mathematics as the three core subjects across six semesters, with laboratory practical work in physics and chemistry, experimental record-keeping and scientific report writing.

Class XII (ISC), St. James School and College, Council for the Indian School Certificate Examinations - 71% (English 76%) (2021)

R E S E A R C H E X P E R I E N C E

Dissertation Researcher, Department of Society-Technology Interface, Central University of Rajasthan (2025-2026)
Designed and conducted a mixed-methods impact assessment of Dvara KhetScore, an alternative credit-scoring model for smallholder farmers, based on a primary survey of 116 farmers in Dudu and Phagi tehsils of Jaipur district, Rajasthan, together with interviews and focus group discussions with farmers, field staff and lending partners. The study found that the score in practice works as a hybrid of digital scoring and human judgement, and that farmers with very small landholdings remain partly excluded from the credit it unlocks. Two papers based on this study have been prepared.

Country Ambassador - India, Dhaka University Research Society (DURS) (January 2026-Present)
Represent India in the society's international research network (ISRC 2026), supporting cross-country academic exchange and student research collaboration.

Research Intern, Department of Humanities and Social Sciences, Indian Institute of Technology Delhi (June-July 2025)
Field research on the digitalisation of healthcare in Chhattisgarh and Jharkhand, including Naxal-affected and gold-mining regions, under Prof. Reetika Khera. Conducted structured surveys and interviews with health workers and community members, with data entry, cleaning and documentation of field findings.

Social Media Assistant, Department of Society-Technology Interface, Central University of Rajasthan (2025-2026)
Managed the department's official social media presence and digital communication, including research-event coverage and content development.

A P P L I C A T I O N D E V E L O P E D

StockItihas - NSE Stock Price History Application (2025-Present)
My own application, designed and built with Python and Streamlit, first for my own ease in following the stock market, and later made freely available to other users in India and abroad. StockItihas archives and presents the complete daily price history of companies listed on the National Stock Exchange of India (3,951 companies, records from November 2021), so that anyone can check the daily prices and the full history of a stock in one place. It is a record-keeping and research tool for students of Indian financial markets. Available at stockitihas.streamlit.app.

P R E S E N T A T I O N S A N D A C A D E M I C W O R K

Research presentation: "Curbing Agricultural Pollution - Analysis and Policy Recommendations for Delhi and Punjab"

A comparative policy analysis of stubble burning and crop residue management in Delhi NCR, Punjab, Haryana and Uttar Pradesh. The presentation examined the objectives and working of the Crop Residue Management schemes of the four states, including machinery subsidies (Happy Seeders and Super Straw Management Systems), custom hiring centres and the Pusa bio-decomposer, and assessed their outcomes: fire incidents fell by about 30 percent in Punjab and 47.6 percent in Haryana between 2021 and 2022, with Rs.3,062 crore of central financial support. It identified the main challenges - high machinery costs, tight cropping windows, low farmer awareness and resistance among small farmers - and closed with policy recommendations for zero-burn agriculture.

Case study: E-Dharti Portal, Rajasthan - the digitalisation of land records

Case study of E-Dharti (Apna Khata), the Government of Rajasthan online land-records portal developed under the Digital India Land Records Modernisation Programme, which gives citizens free online access to Jamabandi (record of rights), Khasra details, mutation status and digitised land maps. The study compared the portal with the traditional paper-based system of tehsil and patwari offices and found that it removes repeated office visits and dependence on middlemen, sharply reduces paper use and the physical infrastructure needed to store and maintain paper registers, and makes land records far easier to obtain, verify and use, for example in bank loan applications, while improving transparency and reducing land-related disputes.

Open seminar: "Ensuring Ethics While Fostering AI Innovation"

An open seminar on how artificial intelligence can be developed and adopted without losing sight of ethics: responsible innovation, fairness and accountability in automated decision-making, and compliance with data privacy law, including the DPDP Act and the GDPR.

TRAINING, CERTIFICATION AND SERVICE

Advanced Training on PLFS Data Extraction and Analysis, V. V. Giri National Labour Institute, Noida

Completed the advanced-level training programme "Practicing to Analyze Employment and Unemployment Trends in India", covering unit-level extraction, cleaning and analysis of Periodic Labour Force Survey microdata.

Certificate, Basic Life Saving Course and CPR Training

Trained in cardiopulmonary resuscitation (CPR), basic life support and first response to cardiac and breathing emergencies.

Music Event Manager, SRIJAN 2026, Central University of Rajasthan

Managed the music events of SRIJAN 2026, the university cultural festival.

Volunteer, Women's Day 2025, Central University of Rajasthan

Volunteered in the organisation of the Women's Day 2025 programme at the university.

Services Selection Board (SSB) Interview, Indian Armed Forces

Appeared twice for the Services Selection Board interview for officer entry to the Indian Armed Forces.

TECHNICAL AND RESEARCH SKILLS

Research methods: survey design (structured and semi-structured), stakeholder interviews, focus group discussions, field documentation and report writing.

Data and analysis: unit-level microdata handling and analysis (PLFS, NFHS, HCES, NSS), data cleaning, processing and extraction, SPSS, R, Stata, Power BI and Tableau, GIS, Apache Hadoop and Spark.

Tools and programming: KoboToolbox, NVivo, LaTeX, MS Office, Zotero, Python, Streamlit, Visual Studio Code, Ollama, GitHub.

Technology: highly tech-savvy, enjoys exploring new technologies, new applications and open-source tools on GitHub and across the internet, and uses technology to make everyday life simpler and easier.

LANGUAGES

English (fluent), Hindi (native).
